DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (disclosed in the Background of Invention) in view of Williams et al. (US 3,902,776).

Applicant's APA substantially disclosed the structure of the claimed invention except a cutting groove is provided between the bodies of the fixing rail.

Williams et al. teach a cutting groove (41).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a cutting groove between bodies of the fixing rails as disclosed in the Applicant's APA, as taught by Williams et al. for easily break apart the terminal parts by user's hand.
